Letter of Impact – *Crop, Forage & Turfgrass Management*, 2015

Launched in 2015, *Crop, Forage & Turfgrass Management*, (formerly separate journals *Applied Turfgrass Science*, *Crop Management*, and *Forage & Grazinglands*) is an international electronic journal published by the American Society of Agronomy and Crop Science Society of America covering all aspects of applied crop, forage and grazinglands, and turfgrass management. The journal serves the professions related to the management of crops, forages and grazinglands, and turfgrass by publishing research, briefs, reviews, perspectives, and diagnostic and management guides that are beneficial to researchers, practitioners, educators, and industry representatives.

Peer Review

All articles undergo rigorous single-blind peer review by an editorial board comprised of members from industry and academia with expertise in crops, turf, and forages. In 2014, while existing as separate journals, *Crop, Forage & Turfgrass Management* achieved a competitive accept/reject ratio with only 54% of articles accepted.

Impact

Although *Crop, Forage & Turfgrass Management* does not currently have an impact factor, this is a long-term goal that we expect to achieve in the next 2–3 years. In the interim, we encourage authors to cite papers from the journal to help build our impact.

Crop, Forage & Turfgrass Management is published by the American Society of Agronomy and Crop Science Society of America, two veteran organizations in the fields of agronomy and crop science that have been publishing scientific research for over 100 years. By publishing your research in our journal, you can feel confident that your research is targeted to and reaching an underserved applied audience, as well as a broader community of hundreds of agronomy and crop science researchers and related institutions.

Sincerely,

Zac Reicher, University of Nebraska–Lincoln, Co-Editor
Daren Redfearn, University of Nebraska–Lincoln, Co-Editor
Peter Thomison, Ohio State University, Co-Editor
