

Vadose Zone Journal Frequent Reviewer Credit Program

Reviewers are the unsung heroes of the peer-review process, and their voluntary and dedicated service is a cornerstone for the success of *Vadose Zone Journal* and its dissemination of high-quality science.

In 2014, the *Vadose Zone Journal* Editorial Board and Soil Science Society of America are implementing a new Frequent Reviewer Credit Program. Those reviewers who complete five reviews during the calendar year will be eligible to publish an accepted paper during the following year without paying publication charges.

Eligible reviewers will receive email notification in January 2015, with instructions for redeeming the credit. Page charges will be waived on a single paper published in 2015 for which the eligible reviewer is one of the authors. An earned Frequent Reviewer Credit in no way affects the peer review process; reviewers who are eligible for the Frequent Reviewer Credit are not guaranteed publication in the journal. Eligible authors are responsible for claiming the redemption at the time they return their proofs. The offer is nontransferable, for one paper only, and must be redeemed in 2015, and will expire at the end of the calendar year. The credit is for VZJ page charges only; it does not include purchases of open access, reprints or reprint pdfs, or other SSSA products or services. The program may be cancelled at any time at the discretion of SSSA.
