Thanks to Our 2018 Reviewers

Maintaining the editorial standards of a scientific journal is an important responsibility because the publications of a society are one of its major services to its members. This task can only be accomplished with the advice of a large number of colleagues who are invited to review manuscripts. Their critical comments and helpful suggestions have played a major part in making Agricultural & Environmental Letters a success. The members of the A&EL Editorial Board express their thanks to all those scientists who reviewed manuscripts in 2018. We extend our apologies and thanks to those reviewers whose names have been inadvertently omitted from this list.
