The second day's program will be devoted to sectional meetings in soils and field crops. For the soils section, Dr. E. Truog of the University of Wisconsin will act as symposium leader for the general subject of "Soil Colloids" and Dr. K. F. Kellerman of the Bureau of Plant Industry will have charge of the symposium on "Nitrogen Fixation." In the field crop section Professor H. R. Sumner of the University of Kansas will conduct a symposium on "The Legume Problem," this program being prepared to be of particular interest to extension workers. The second symposium on "Plant Physiology and Agronomic Science" will be in charge of Dr. W. L. Burlison of the University of Illinois.

In the evening of the second day, the usual dinner will be held along with the annual business meeting. M. F. Miller, President.

MEETING OF THE WESTERN BRANCH OF AMERICAN SOCIETY OF AGRONOMY

The eighth annual conference of the Western Branch of the American Society of Agronomy (formerly Western Agronomic Workers) was held at Laramie, Wyoming, July 21-23, 1924. The conference was attended by about fifty representatives from the states of Wyoming, North Dakota, South Dakota, Nebraska, Kansas, Montana, Colorado, Arizona, Idaho, Utah, Washington, California, and the United States Department of Agriculture. The program was as follows:

Monday, July 21:—Morning Session

3. "Roll Call." Each man gave his name, position, and a brief statement of his work.

Afternoon Session

   Discussion led by Roy Westley, Extension Agronomist, University of Wyoming. Emphasized the importance of making pure seed readily available for local consumption.

   This paper gave in detail the best method worked out for the production of Ladino clover seed and showed the value of this crop as a dairy pasture on land with a high water table but no alkali.
