3. THE FUNCTION OF ANNUAL LEGUMES

EARL E. BARNES

If annual legumes have any place in the rotation it must be to improve it. Analyzing the uses to which they are being put, I think we can classify them under four heads as follows:

1. Catch crops for green manure or additional feed.
2. Emergency crops, i.e., crops used to take the place of some other crop in the rotation which for some reason has failed to materialize.

Paper read as a part of the symposium on "The Legume Problem" at the meeting of the Society held in Washington, D.C., November 11, 1924.
