SEED YIELDS OF RHODE ISLAND COLONIAL BENT
(*AGROSTIS TENUIS SIBTH*) AS INFLUENCED BY THE
KIND OF FERTILIZER APPLIED1

H. F. A. NORTH AND T. E. ODLAND2

The fine bent grasses, as distinguished from redtop, have largely
replaced other grasses for use on the putting greens of golf courses in
the northern sections of the United States. These grasses are adapted
also in relatively humid parts of this area for the making of turf for
