SMALL-GRAIN NURSERY EQUIPMENT

THREE pieces of nursery equipment which may be of interest to those working with the small grains have been designed or modified recently at the Cornell University Agricultural Experiment Station. Descriptions with photographs are given below.

I. Modified Jari Rod-row Cutter

The basic design of this power cutter was obtained from photographs and drawings furnished by E. R. Ausmus (Minnesota) and K. J. Frey (Michigan). The modification involves a movable grain carrier with canvas apron....
