international agronomy. The new division will be called Division A-6, International Agronomy.

It was pointed out that the formation of this new division will probably result in the termination of the ACS921 International Agronomy Committee.

This was an informational item, therefore no action was taken.

ACS922. Cooperation with ALAF

Dr. M. F. Baumgardner, who has been reappointed as Chairman of the ACS922 Committee, reported that since the annual meetings in New Orleans this committee has given its attention to the problem of ways to gain closer cooperation between ALAF and the three associated societies. Thus far the committee has concentrated on 1) ways to upgrade ALAF publications and 2) ways to strengthen the ALAF secretariat and promote membership in that organization.

Dr. Baumgardner said that steps are already underway to help establish ALAF's secretariat. It is hoped that Ing. Miguel Paulette, ALAF's Executive Secretary, will spend several weeks in the headquarters office. It is also hoped that sometime before the January, 1972, Executive Committee meeting, the ACS922 Committee and an ALAF representative can get together at the headquarters office to plan cooperative objectives for the next 3 to 5 years.

A finalized ALAF project proposal, and the budget for the project, will have to be approved by the CSSA (as well as the ASA and SSSA) Board of Directors before it can be submitted to outside funding agencies. The project is of such scope that outside financial assistance will be a necessity.

ACTION: It was moved that the CSSA Board of Directors support in principle the efforts of the ACS922 Committee in continuing its efforts for a desirable program for gaining closer cooperation with the ASA, CSSA, and SSSA. Seconded. Carried.

The ASA Board of Directors took similar action.

AC994. International Turfgrass Society

Dr. R. R. Davis, Chairman of the Executive Committee of the International Turfgrass Society, had conveyed his interest in regard to the possibility and desirability of the CSSA, SSSA, or both societies, cosponsoring the proceedings from the forthcoming conference.

It was pointed out that the formation of this new division will probably result in the termination of the ACS921 International Agronomy Committee.

Seconded. Carried.

The meeting was adjourned.

President's Report

General Report:

Establishment of the Position of Editor-in-chief. Dr. R. W. Howell was appointed to the new position of editor-in-chief, CSSA. He is responsible for supervision of all publication activities of the society, including Crop Science and special publication projects. He makes recommendations to the President and Board of Directors on policy matters and is responsible for implementation of society policy with respect to publications. Duties for editor-in-chief were developed in considerable detail and published in the Agronomy News. The editor-in-chief is a member of the Board of Directors and an ex officio member of all editorial committees of the society. This gives him opportunity to help plan society publications and to advise the Executive Committee and Board of Directors on editorial matters. He will also meet with the Program Planning Committee to aid in making long-range plans for annual meeting programs, as well as publications. The editor of Crop Science has responsibility for editorial aspects of Crop Science as in previous years. There is no material change in the way manuscripts are reviewed and edited.

Interpretive Summaries. In January, your Executive Committee moved to have participants in C-Division programs prepare an interpretive statement to accompany each abstract. ASA and SSSA Executive Committees passed similar motions for their societies.

Council for Agricultural Science and Technology. At the August 1970 meetings in Tucson, the Boards of Directors of CSSA, SSSA, and ASA endorsed in principle an approach for the council. Subsequently, a committee was formed representing the ASA, CSSA, and SSSA. He is responsible for supervision of all publication activities of the society, including Crop Science and special publication projects. He makes recommendations to the President and Board of Directors on policy matters and is responsible for implementation of society policy with respect to publications.
