

Registration of 'Lyon' Soybean

'Lyon' soybean [Glycine max (L.) Merr.] (Reg. no. CV-323, PI 576857) was released as a cultivar because of its productivity and multiple pest resistance. It is of Group VI maturity. Lyon was developed by the USDA-ARS in cooperation with the Mississippi Agricultural and Forestry Experiment Station and was approved for release as a cultivar in April 1993. Prior to release, it was identified as D87-5870. Lyon is of Group VI maturity, averaging 4 d earlier in competition with 'Royal', a blue-aleurone, six-row spring barley (Hordeum vulgare L.) (Reg. no. CV-245, PI 576855) was developed by the Minnesota Agricultural Experiment Station and released February 1994.
