The Dynamics of Sugarcane and Sugar Yields in Florida: 1950–2018
Andrew Schmitz* and Fangyi Zhang

The original version of this article included an incorrect list of parties responsible for the development of CP varieties on p. 1885. The sentence has now been corrected in the online version:

“In the framework outlined by Schmitz et al. (2010) and Schmitz and Zhu (2017), it is necessary to calculate the gains and costs from research and development, which would be easy to do since the research and development is limited to the USDA, University of Florida, and the Florida Sugar Cane League.”
