Phosphorus Forms in Manure and Compost and Their Release during Simulated Rainfall

The authors wish to report an error in the results presented in Fig. 1 and 2 in the above manuscript. The data in Fig. 1 and 2 were accidentally reversed. Dissolved inorganic P leached from manures, composts, and litter during successive rainfalls was greater than dissolved organic P concentration. The corrected Fig. 1 and 2 are given below.

---

**Fig. 1.** Dissolved inorganic P leached from manures, composts, and litter during five consecutive simulated rainfalls. Values are the averages of three replicates ± SE.

**Fig. 2.** Dissolved organic P leached from manures, composts, and litter during five consecutive simulated rainfalls. Values are the averages of three replicates ± SE.
