Supplemental Fig. S1. Phosphorus application sources reported in the Drain Load database; SSP/TSP: single superphosphate or triple superphosphate, MAP/DAP: mono- or di-ammonium phosphate.
Supplemental Fig. S2. Phosphorus application timing by product for Drain Load Fertilizer #1 site-years (a, bottom), Fertilizer #2 site-years (a, top), and when only one P source was reported in a corn site-year (b); SSP/TSP: single superphosphate or triple superphosphate, DAP: diammonium phosphate.
Supplemental Fig. S3. Phosphorus application method by product source for Drain Load

Fertilizer #1 site-years (a, bottom); Fertilizer #2 site-years (a, top), and when only one P source was reported in a corn site-year (b); SSP/TSP: single superphosphate or triple superphosphate, DAP: di-ammonium phosphate.
