SUPPLEMENTAL MATERIALS

Manure and Inorganic N Affect Trace Gas Emissions Under Semi-Arid Irrigated Corn

Ardell D. Halvorson, Stephen J. Del Grosso,* and Catherine E. Stewart

List of Figures

Figure S1. Cumulative CO₂-C emissions for each N treatment in 2012, 2013, and 2014 as a function of day-of-year (DOY). (DM=dairy manure; DM+AP=dairy manure plus AgrotainPlus).

Figure S2. Cumulative N₂O-N emissions for each N treatment in 2012, 2013, and 2014 as a function of day-of-year (DOY). (DM=dairy manure; DM+AP=dairy manure plus AgrotainPlus).

Figure S3. Daily N₂O-N emissions, soil temperature, irrigation amount, and precipitation amounts for each N treatment in 2012, 2013, and 2014 as a function of day-of-year (DOY) for the 145 days following manure application. (DM=dairy manure; DM+AP=dairy manure plus AgrotainPlus).

Figure S4. Cumulative NH₃-N emissions for each N treatment in 2012, 2013, and 2014 as a function of day after manure application (91 days total, arrows represent the day of urea and SuperU application). (DM=dairy manure; DM+AP=dairy manure plus AgrotainPlus).

Figure S5. Cumulative CH₄-C emissions for each N treatment in 2012, 2013, and 2014 as a function of day-of-year (DOY). (DM=dairy manure; DM+AP=dairy manure plus AgrotainPlus).
Figure S1. Cumulative CO$_2$-C emissions for each N treatment in 2012, 2013, and 2014 as a function of day-of-year (DOY). (DM=dairy manure; DM+AP=dairy manure plus AgrotainPlus).
Figure S2. Cumulative N₂O-N emissions for each N treatment in 2012, 2013, and 2014 as a function of day-of-year (DOY). (DM=dairy manure; DM+AP=dairy manure plus AgrotainPlus).
Figure S3. Daily $\text{N}_2\text{O}$ emissions, soil temperature, irrigation amount, and precipitation amounts for each N treatment in 2012, 2013, and 2014 as a function of day-of-year (DOY) for the 145 days following manure application. (DM=dairy manure; DM+AP=dairy manure plus AgrotainPlus).
Figure S4. Cumulative NH$_3$-N emissions for each N treatment in 2012, 2013, and 2014 as a function of day after manure application (91 days total, arrows represent the day of urea and SuperU application). (DM=dairy manure; DM+AP=dairy manure plus AgrotaınPlus).
Figure S5. Cumulative CH$_4$-C emissions for each N treatment in 2012, 2013, and 2014 as a function of day-of-year (DOY). (DM=dairy manure; DM+AP=dairy manure plus AgrotainPlus).
