SUPPLEMENTAL MATERIAL

Supplemental Fig. S1 shows the mean wheat straw Cd concentrations (mg kg\(^{-1}\) FW) in different cultivars at the three sampling locations. Supplemental Fig. S2 shows the frequency distribution of Cd concentrations (mg kg\(^{-1}\) FW) in wheat grain is samples collected during the field survey.
Supplemental Fig. 1. Mean wheat straw Cd concentrations (mg kg$^{-1}$ FW) in different cultivars at A) Methven B) Temuka and C) Oreti site. Mean ($n = 4$) and standard error followed by the same letter are not significantly different ($P < 0.05$).
**Supplemental Fig. 2.** Frequency distribution of wheat grain Cd concentrations (mg kg\(^{-1}\) FW)
