July 30. Thursday.

Our tenth day. Collis and I had a short five-mile ride in the Bell to Upper Red Top Meadow. We saw seven mule deer on the way up. We were to walk the creek trail back to Chamberlain. I carried my fishing rod. We ate four cutthroat trout for dinner. Collis showed me how to bake the trout over hot coals using a forked stick and keeping the trout about four inches above the coals. They were delicious. We walked into camp by 3:00 p.m.

The DC-3 was to pick us up at 6:00 but he was late. We left Chamberlain at 9:00 p.m. The plane had been dropping smoke jumpers on the Nez Perce National Forest. The door on the Doug was off for the jumpers so we had a noisy, cold ride back to Boise. We touched down at Boise about an hour later. All of a sudden I was really tired and anxious to get home.

When I drove in the yard, Patsy and the children were at the door. They had made a welcome home sign in the yard. It was on a piece of old sheet and the children had used their paint sets.

It sure was good to be home.
