The retirement of six of the major architects of the nation's soil survey program has been announced.

Charles E. Kellogg, Deputy Administrator for Soil Survey, retired on May 31, 1971, after 37 years in Federal service, including 20 years with the Soil Conservation Service.

Dr. Kellogg, like his five colleagues, had an extraordinary career during a period in which the major discoveries and developments in modern soil science were made. Dr. Kellogg was a pioneer in the field of
