SOILS COURSES IN ARMY RESERVES

Gary Steinhardt
Department of Agronomy, Purdue University

Here is some information that may be of interest to those of you in the U.S. Army Reserves. The U.S. Army Engineer School at Ft. Belvoir, Virginia is offering two correspondence courses of interest to soil scientists. "Soils Engineering", subcourse 360, presents a study of soils from the engineer's point of view. In it is discussed: soil properties, soil classification, compaction, California Bearing Ratio, frost action and construction methods. "Topographic Mapping and Engineer Use of Aerial Photography" subcourse 388, covers the principles of aerial photograph interpretation, reconnaissance and site selection. Both courses are interesting and well presented. A catalog and enrollment information can be obtained from:
