INDIANA ACCELERATES SOIL SURVEY

D. P. Franzmeier
Purdue University

The Indiana Legislature in its 1974 session approved an appropriation to increase state support on the soil survey. The goal is to complete the survey in ten years. This will require increasing the number of field soil scientists from about 30 at the beginning of the program to about 60 at the peak of the program. In addition to the field work, state funds will support a soil characterization laboratory at
