Analysis of Income and Expense

*Soil Survey Horizons*

(Volume 27, 1986)

**Income:**
1042 Subscriptions ................................... $10,298.56
Back volumes, single issue sales .................. 125.00

Total Income $10,423.56

**Expenses:**
Composition, printing, and paper .............. $3,612.54
Distribution ........................................ 1,017.42
Personnel costs .................................... 3,365.88
Headquarters office (overhead) ................. 1,739.10

Total Expenses $9,734.94
Excess of income over expenses $688.62

The Editorial Board presents the above analysis for your information. *Soil Survey Horizons* has been in the black for 2 consecutive yr and 3 of the past 4 yrs. However, income for Vol. 27 was down by $305 from Vol. 26, 1985 primarily due to a decrease of 72 paid subscriptions.

The Editorial Board extends a sincere thank you to those who contributed articles, information, and paid for a subscription to *Soil Survey Horizons*. We encourage you to urge your nonsubscribing colleagues to order a subscription to your publication, *Soil Survey Horizons*. We must continue to maintain 1,100 to 1,200 subscriptions to show an income for the publication.

International Working Meeting on Soil Micromorphology (IWMSM) to be Held in Texas

The International Society of Soil Science (Subcommission B) will be sponsoring an IWMSM on July 10 to 15, 1988 in San Antonio, TX.

The program will emphasize applications of soil micromorphology. Topical areas include: cracking clay soils (Vertisols), soils of dry regions (Aridisols), Hydromorphic soils, soils enriched with carbonates, gypsum and other salts, micromorphological techniques in teaching and research, mineral weathering, applications of micromorphology to agronomic and earth sciences, and paleopedology. With the exception of invited papers, all work presented during the meetings is expected to be original research. Both oral and poster presentations will be included.

Pre-, post- and mid-conference field trips are planned.

For additional information, contact: Dr. Richard Drees; Dep. of Soil and Crop Sciences; Texas A&M University; College Station, TX 77843-2474.
