Committee reports were given on the following projects, among others:

1. Development of a travel guide to help the public understand the soils and landscapes of the state.
2. Selection of state soil. Six members gave campaign speeches for their candidates.
3. Glacial till data. Procedures are being developed for systematically recording and synthesizing information collected on glacial tills during soil surveys.

Missouri Association of Professional Soil Scientists (MAPSS) Meet

Kenneth D. Vogt†

The MAPSS held its annual meeting Oct. 9–11, 1986 at Camp Clover Point, Lake of the Ozarks State Park. The program was centered on soil interpretations with several speakers giving presentations, and a field trip was made to observe a soil moisture research project. Costs were kept reasonable by lodging in cabins and having buffet-style meals served in the camp dining hall.

A scholarship fund was established with a stipend to be given yearly to a senior majoring in soil science at a Missouri college. Funds for the scholarship were obtained by an auction and raffle of donated items. Other money raising ideas were discussed for future years.

The officers for 1987 are:

President: Mike Cook
Vice-president and President-elect: Randall J. Miles
Secretary-Treasurer: Paul Minor
Member-at-large: Alice Geller
