Associate Editor Named for Western Region

J. Herbert Huddleston, Department of Crop and Soil Science, Oregon State University, has been named by the editorial board as an Associate Editor, Western Region, for Soil Survey Horizons. Dr. Huddleston's initial appointment is to complete the term of Mon Yee who resigned from the editorial board earlier this year when reassigned to the SCS National Soil Survey Office in Washington, DC. Dr. Yee's term was through December 1993.

Dr. Huddleston has served as a faculty member and Extension Service soil scientist at Oregon State University since 1976. Prior to his appointment at OSU he served for 7 yr on the faculty of the Univ. of Wisconsin—Green Bay. Dr. Huddleston received his B.S. and M.S. degrees from Cornell University and his Ph.D. in soil morphology and genesis from Iowa State University.

Dr. Huddleston's programs focus on environmental applications of soil science, soil survey interpretations, and soil judging. He has recent publications about soil productivity, soil productivity ratings, and land evaluation and site assessment.

Readers and contributors located in the western region are encouraged to correspond with or call Dr. Huddleston at his office in Corvallis. His address and telephone number are listed on the masthead of this issue.
