Editorial Board Meets in Seattle, Washington

Bill R. Smith

The Soil Survey Horizons Editorial Board met on Nov. 14, 1994, in Seattle, Washington, in conjunction with the annual meetings of the Soil Science Society of America (SSSA) and the American Society of Agronomy (ASA). The next day, the editor made a brief report about Soil Survey Horizons at the business meeting of Division S-5 of SSSA. Items discussed at both meetings are listed below.

a. Mike Ulmer and Dr. Maury Mausbach were welcomed as new members of the editorial board. Mike is associate editor for the North Central Region and Maury is associate editor for the National Soil Survey Office. Jim Richardson, North Dakota State University, and Lawson Spivey, National Office, Washington, District of Columbia, completed their second 3-yr terms at the end of 1994. Appreciation was expressed to Jim and Lawson for their work on behalf of the contributors to and readers of Soil Survey Horizons for the past 6 yr.

b. Dr. Jerry Bigham, editor-in-chief of the Soil Science Society of America Journal, met with the editorial board for a short time to follow up the informal discussion begun at the board meeting last year. Discussion centered on enlarging the scope of Soil Survey Horizons to include more practicing field soil scientists in consulting and interpretations. Those who are involved in wetlands delineations were mentioned as one possible group. It was noted that some practicing field soil scientists already subscribe to Soil Survey Horizons. The board agreed to continue these discussions. No one is interested in doing anything that would detract from the quality of Soil Survey Horizons.

c. A total of 986 subscriptions were enrolled for Vol. 35, 1994. This is an increase of 27 from 1993.
