North Dakota Selects "Soil of the Year"
Bruce Seelig

The Professional Soil Classifiers Association of North Dakota each year nominates a soil to the Governor to be proclaimed "Soil of the Year". This year the Governor proclaimed the Grail series "Soil of the Year". Below is the Governor's proclamation and the cover page of a brochure explaining the program.

PROCLAMATION
GRAIL SOIL
2002 Soil of the Year

WHEREAS, North Dakota's most important natural resource is the soil; and

WHEREAS, the American Elm (state tree), the Wild Prairie Rose (state flower), and the Western Wheat Grass (state grass) all have their roots in the soil. Even milk (state beverage), the Western Meadowlark (state bird), and Preserved Wood (state fossil) could not be present in North Dakota without soil; and

WHEREAS, North Dakota has always been a predominantly agricultural state. We have a better chance of preserving our agricultural heritage by making people more aware of how important it is to protect our soil resource; and

WHEREAS, using the theme, "Soil of the Year", a different soil will be selected each year to inform North Dakota citizens of the rich variety of soils we have in the state; and

NOW, THEREFORE, as the Governor of the State of North Dakota, I do hereby proclaim Grail Soil, as the 2002 Soil of the Year for the state of North Dakota.

ATTEST:

Alvin A. Jaeger
Secretary of State

1 President, Professional Soil Classifiers Association, Extension Agricultural and Biosystems Engineering, North Dakota State University, P.O. Box 5626, Fargo, ND 58105-5626.
