Con-"Vert-te-Sol" that to map you don't like, 
To something you can see from a short hike. 
In the high mountains you need a good start, 
Get the "Ox-a-slow" two-wheeled cart.

Sus-"Spod-a-Sol" is high in the rocks, 
And you need help to defend the spots, 
And if there's lakes to be fished, 
Take me along, I'll find trout that needs dished.

Alfisols you'll find in the mountains, 
Where aspens bring forth Golden Fountains.

In Las Cruces we'll work with you yet, 
I'm not through, not even a little bit.

From here on remember this one thing, 
Your mark is forever written and it will bring, 
To those who follow a lot of satisfaction, 
To see your plan and works take action.

THE MINDORO CUT

Francis D. Hole
University of Wisconsin

The Soil Survey Report for La Crosse County, Wisconsin (Beatty, M.T., 1960: S.C.S. Series 1956, No. 7) shows in section 4, T. 17 N., R. 6W a wooded ridge mapped "Rough Broken Land and Rock Land", flanked by very steep (30-60%) Gale-Hixton Complex of soils developed over soft Cambrian sandstones and siltstones; and coves of steep Gale and Hixton silt loam, deeper Fayette silt loam (formed in loess) and colluvial Chaseburg silt loam. The earlier soil survey of La Crosse County (Whitson, A.R., W. J. Geib, T. J. Dunnewald, and Clarence
