ERRATA

Wheat Residue Loss from Fields under No-till Management

D.E. STOTT, H.F. STROO, L.G. ELLIOTT, R.I. PAPENDICK, AND P.W. UNGER

On p. 94, in the results for Site B, surface residue levels were measured at Weeks 10, 32, 38, 43, and 49 with 4, 38, 50, 56, and 80% of the original mass lost. The values for percent of mass lost given in Column 2, Line 6 of the second full paragraph are incorrect.
