I beg to submit herewith the report of the Secretary for the year.

The membership of the American Soil Survey Association is now 182. The year has been a very good one in spite of the fact that a number have dropped out, due to change of profession. The enrollment of new members has been quite gratifying and the total for 1925 is only 5 under that for 1924.

The most important part of the years work has been the publication of Bulletin VI which is a report of the annual meeting held in Chicago, Illinois, November 20 and 21, 1924. This report contains all the papers that were delivered. It contains 161 pages of printed matter and was published in two volumes. Two hundred and fifty copies were issued. The excellence of the work was largely due to the stencils which were cut by the U. S. Bureau of Soils, Washington, D.C. Copies were mailed to all members.

An effort was made from time to time during the year to interest new men in our Association. The result has been quite gratifying and a number of new members have been enrolled.

The sale of extra copies of Bulletin VI has brought in a small revenue. The demand for all back issues of our Bulletin, by Libraries and individuals to complete sets, has been quite heavy. Unfortunately the supply of all back issues has long since been exhausted.

Calls for the American Soil Survey Association Bulletin come from many countries. During the year copies of Bulletin VI have been sent to the Philippine Islands, Scotland, India, and Honolulu. We have just recently had a request from Scotland for a complete set of reports.

Sincerely yours,

A. M. O'Neal
Secretary.
