APPENDIX 1-1: Online survey form for question submission.

**Top 25 questions for soil science research in the 21st century: Defining the future path for soil sciences research**

Before you begin this survey, please take some time to compose your question. Please review the criteria that will be used for screening and selection of final 25 questions.

**Question(s) should:**
1. Address important gaps in knowledge (has not been already answered).
2. Be answerable through a realistic research design.
3. Have factual answer that does not depend on value judgment.
4. Not have “Yes” or “No” as answer(s).
5. Be of the scale that in theory a team might have a reasonable attempt at answering.

Please provide information about yourself:
Name ____________________________________________
Email ____________________________________________
Institution/Organization/Company ____________________________
Phone number ____________________________________________
Specialization/ Research Area ____________________________

Choose a Thematic Area ______________________ (from the list of 5 Thematic Areas)

**Question (1)**
________________________________________________________________________
________________________________________________________________________

Choose a Thematic Area ______________________ (from the list of 5 Thematic Areas)

**Question (2)**
